Projects as a Full Time Employee

Food Portal

React, .NET, Bootstrap, Mail Service, PDF Generation

Frontend Developer

Developed 'Food Portal', akin to Swiggy/Zomato, tailored for bulk orders. Enhanced features cater to large-scale food procurement, facilitating efficient ordering, tracking, and delivery, tailored to business needs.

Roles and Responsibilities

- Design and implement user interfaces for the project as a frontend developer.
- Ensure intuitive navigation and seamless user experiences throughout the application.
- Collaborate with team members to integrate frontend components with backend functionalities.
- Optimize application performance and responsiveness across various devices and screen sizes.
- Continuously improve the functionality and aesthetics of the application based on user feedback and usability testing.
- Stay updated with the latest frontend development trends and technologies to incorporate best practices into the project.

ECard - Healthcare Domain

React - Typescript, .NET, Tailwind CSS

Frontend Developer

Developed 'Ecard' Web Application, facilitating patient well-wishes via ecards. Admin tools enable ecard management, metrics monitoring, and automated reminder emails for ecard collection. Streamlined interface ensures seamless user experience, enhancing patient and staff engagement while promoting efficient hospital communication and support.

Roles and Responsibilities

- Wrote Jest test cases to ensure robust code quality and functionality.
- Integrated APIs to fetch and send data seamlessly between the application and external services.
- Ensured responsiveness across devices and screen sizes for optimal user experience.
- Conducted bug fixing to maintain application stability and performance.
- Provided ongoing support and maintenance to ensure the smooth operation of the application.

Huddle Now - Healthcare Domain

React, .NET, Tailwind CSS

Bug Fixing

Huddle Now is a board to track the activities/tasks/risk or blockers. Essentially, a huddle board provides a record of where the team is at each day, and the sections on the huddle board help guide the discussion during a meeting.

Roles and Responsibilities

- Investigated reported bugs and issues in the existing project.
- Identified root causes of bugs through thorough analysis and debugging.
- Developed and implemented solutions to resolve identified issues promptly.
- Conducted rigorous testing to ensure bug fixes were effective and did not introduce new issues.
- Documented bug fixes and communicated with the team to ensure awareness and collaboration in resolving issues.
